ZERØ WASTE

The **ZERO WASTE** project is like a three-legged stool.

Unless each of the legs is solid, it will not stand up.

The three legs are: The Town Council, the company responsible for waste collection, and citizens.

If the support of even just one of the three legs is missing, the stool will break and the project will collapse.

The Diecimo recycling depot is an area for the collection of household waste: paper, iron, bulky objects, etc., manned by qualified personnel. During the transfer of certain types of waste, private users who use their own transport to come to the recycling depot will accumulate ecopoints on presentation of their health cards, which will entitle them to a discount on the variable part of their waste tax, according to an environmental score earned during the year.

The Diecimo recycling depot has the following timetable:

Tuesday and Saturday from 8.00 to 13.00

Thursday from 8.00 to 13.00 and from 15.00 to 18.00
