Città di Lucca

# The new recycling in the suburbs

NON-HOUSEHOLD WASTE - RED ECOCALENDAR

Dear business owner,

On **July 6, 2020** an important innovation in the sorted waste collection system of the suburbs of Lucca becomes effective: **the separation of glass from plastic and aluminum**. So we can improve the quality of the sorted waste collection and take another step to environmental safeguard.

With this innovation, **the door-to-door sorted waste collection calendar changes too**: in fact, two specific days are scheduled for the collection of glass, different from those of light multi-material (plastic and aluminum).

From 6 July, therefore:

- ▶ glass must be disposed alone, in the appropriate bin. The glass must be delivered loose (without bags of any kind)
- ▶ the light multi-material (plastic and aluminum) must be disposed into the appropriate container, according to the indications provided by Sistema Ambiente.
